this book investigates civil society regionalization in southern africa the point of departure is the study of new regionalism which refers to the wave of regional integration globally since the 1980s however whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes important gaps remain in particular the relatively scant emphasis given to civil society this particularly relates to regions in the global south including southern africa the overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in southern africa both empirically and from a theoretical perspective through analysing the cases of trade and hiv aids the study finds that csos can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization

through framing issues and to a less extent making identities regional furthermore the book enhances knowledge of the heterogeneous nature of civil society regionalization lastly it is demonstrated that going regional is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in southern africa

microbiome and metabolome in diagnosis therapy and other strategic applications is the first book to simultaneously cover the microbiome and the metabolome in relevant clinical conditions in a pioneering fashion it addresses not only the classic intestinal environment but also the oral gastric lung skin and vaginal microbiome that is in line with the latest investigations nonbacterial microbiomes such as fungi and viruses are not overlooked and the plasma microbiome is also discussed as plasma brain placenta tumor cells and other sterile fluids and tissues are increasingly recognized to potentially host a microbiome albeit a limited one this is a timely resource the book s editors were fortunate to have the input of renowned collaborators from nearly all continents this is truly an international effort that brings the latest in the field to students and professionals alike provides comprehensive coverage on diagnosis therapy pharmacotherapy and disease prevention in context of the microbiome and metabolome focuses on the proposed physiological or pathological conditions presents an up to date useful reference
