winner of the pulitzer prize and a documentary from ken burns on pbs this new york times bestseller is an extraordinary achievement the new yorker a magnificent

profoundly humane biography of cancer from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure control and conquer it to a radical new understanding of its essence now includes an excerpt from siddhartha mukherjee s new book *Song of the Cell* physician researcher and award winning science writer siddhartha mukherjee examines cancer with a cellular biologist s precision a historian s perspective and a biographer s passion the result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with and perished from for more than five thousand years the story of cancer is a story of human ingenuity resilience and perseverance but also of hubris paternalism and misperception mukherjee recounts centuries of discoveries setbacks victories and deaths told through the eyes of his predecessors and peers training their wits against an infinitely resourceful adversary that just three decades ago was thought to be easily vanquished in an all out war against cancer the book reads like a literary thriller with cancer as the protagonist riveting urgent and surprising the emperor of all maladies provides a fascinating glimpse into the future of cancer treatments it is an illuminating book that provides hope and clarity to those seeking to demystify cancer

navigating the tumultuous waters of cancer treatment and decision making is difficult for all patients it is also difficult for doctors and other medical personnel this book deals with a variety of emotion related and ethics issues that form much of the basis of the world of cancer related medicine the responsibilities of the physician relative to truth full disclosure patient autonomy death and dying physician assisted suicide and suicide in general among cancer patients these and many other matters are discussed using real stories from the author s extensive personal career in working with cancer patients and their families this is not a book on treating cancer but instead is a work that seeks to stimulate a dialog about these issues as well as the spiritual aspects of hope and other factors relating to the plight of cancer patients and their families written for health care professionals and cancer victims and their families alike the core of the book centers around questions of medical ethics doctor patient relationships decision making during cancer treatment from medical and patient points of view given the emotional commitment and energy level required to work with cancer patients in a moral and ethical manner medical students and residents will ask themselves do i really want to be a cancer physician can i handle the ups and downs of treating people who may or may not be destined to fight and lose the battle against this strong nemesis how will i answer the tough questions regarding medical approaches to cancer how will i respond to patients who indicate a desire to commit suicide or request my help in doing so what can i tell families whose loved one is choosing treatments that will not help and will deteriorate his quality of life basing his responses on the oath of hippocrates the author illustrates how adaptable this oath actually is when considering the secular society in which we function the cancer experience instructs doctors medical students and health care workers involved in cancer care on the proper role of medicine the role of the doctor and the opportunities for connecting with patients as they help them make decisions regarding treatment and end of life issues it helps patients understand the issues facing doctors as they assist them care for them and try to maintain both close personal relationships but enough emotional and professional distance in order to protect themselves from the stress and strain when medicine fails and patients must face the hardest choices here the author promotes a return to traditional medical values that promote closer doctor patient relationships in an effort to promote trust civility and partnership

the most important cancer book you will ever read what do you do when your world is turned upside down by a diagnosis of cancer how do you sort through the dizzying array of conventional and nonconventional treatment options while also searching for meaningful ways of embracing the mental emotional and spiritual dimensions of healing the journey through cancer answers these questions and more board certified oncologist jeremy geffen md has spent more than fifteen years providing treatment guidance and care for thousands of cancer patients and their families in this groundbreaking work he offers real and inspiring solutions to the unique challenges encountered on the cancer journey while honoring and caring for the whole person and his or her entire family at every step along the way full of practical guidance the journey through cancer will help you to understand the essential aspects of conventional diagnosis staging and treatment make informed and intelligent choices about the most effective safe and reliable complementary and alternative therapies discover new possibilities for physical mental emotional and spiritual well being

when the woman he loved was diagnosed with a metastatic cancer science writer george johnson embarked on a journey to learn everything he could about the disease and the people who dedicate their lives to understanding and combating it what he discovered is a revolution under way an explosion of new ideas about what cancer really is and where it comes from in a provocative and intellectually vibrant exploration he takes us on an adventure through the history and recent advances of cancer research that will challenge everything you thought you knew about the disease deftly excavating and illuminating decades of investigation and analysis he reveals what we know and don't know about cancer showing why a cure remains such a slippery concept we follow him as he combs through the realms of epidemiology clinical trials laboratory experiments and scientific hypotheses rooted in every discipline from evolutionary biology to game theory and physics cogently extracting fact from a towering canon of myth and hype he describes tumors that evolve like alien creatures inside the body paleo oncologists who uncover petrified tumors clinging to the skeletons of dinosaurs and ancient human ancestors and the surprising reversals in science's comprehension of the causes of cancer with the foods we eat and environmental toxins playing a lesser role perhaps most fascinating of all is how cancer borrows natural processes involved in the healing of a wound or the unfolding of a human embryo and turns them jujitsu like against the body throughout his pursuit johnson clarifies the human experience of cancer with elegiac grace bearing witness to the punishing gauntlet of consultations surgeries targeted therapies and other treatments he finds compassion solace and community among a vast network of patients and professionals committed to the fight and wrestles to comprehend the cruel randomness cancer metes out in his own family for anyone whose life has been affected by cancer and has found themselves asking why this book provides a new understanding in good company with the works of atul gawande siddhartha mukherjee and abraham verghese the cancer chronicles is endlessly surprising and as radiant in its prose as it is authoritative in its eye opening science

battling and beating cancer the cancer survival book is an inspiring story of a couple fighting cancer together it provides a poignant look at cancer from the perspectives of patient and caregiver covering the highs and lows from diagnosis to surgery to chemotherapy to radiation to follow up to fighting back for people impacted by cancer it also serves as an important survival resource for patients and families battling cancer loaded with checklists information tips and insights it even outlines a strategy and national call to action for curing cancer this is a compelling story of

general interest and a must read for the millions of americans impacted by cancer

ten year old shannon chamberlain describes in abc format her bout with cancer concludes with a discussion of childhood cancer suggested reading list glossary and resource guide

if you or someone you love has been diagnosed with cancer you want to do everything possible to beat the disease but with so much conflicting advice and so many options available how do you decide on the best treatment plan for you in this major new book professor jane plant and professor mustafa djamgoz present a clear and scientifically sound 10 step programme to help you beat cancer at a time when you may be feeling helpless and confused this book provides the essential guidance you need to take control of your life and regain your health with targeted advice for specific cancers included in the 10 step plan inform yourself understand what cancer is what causes it and how to avoid carcinogens choosing the right treatment evidence based advice on conventional and complementary therapies including chemotherapy radiotherapy surgery and medication change your lifestyle guidance on diet exercise reducing stress relationships and other lifestyle factors that have a proven link with cancer beat cancer will help you prevent cancer tackle your diagnosis and stay in remission

this comprehensive ground breaking title presents in simplifying style the driving and organizing principles of cancer making this multidimensional highly complex disease easily understandable for readers developed out of the renowned author s many years of teaching a widely popular several hundred student college course this 12 chapter book begins with an account of the history of cancer as a medical and public health problem as well as the major milestones and setbacks in the ongoing quest to understand the wide variety of cancers that continue to impact the world subsequent chapters then address pathogenesis incidence and mortality statistics risk factors causal factors screening challenges and victories treatment strategies and disease prevention approaches this wealth of clinical information is further supplemented with socioeconomic discussions on the financial social ethical technological regulatory political and logistical challenges that limit progress in cancer research a soon to be gold standard text that thoroughly and expertly describes cancer as a composite adaptive system cancer the enemy from within equips and empowers all undergraduate students and graduate students to better understand this continually perplexing disease clinicians across all disciplines may also find this work of great interest

each issue is packed with extensive news about important cancer related science policy politics and people plus there are editorials and reviews by experts in the field book reviews and commentary on timely topics
